

Paul Mugabi

Senior Lecturer in the Department of Forestry, Biodiversity and Tourism. He holds a PhD in Wood Science from the University of Stellenbosch, South Africa; MSc in Management of Natural Resources and Sustainable Agriculture from the Agricultural University of Norway; and a BSc. in Forestry from Makerere University. He has spent over 17 years conducting research in forest and wood utilization, wood processing and preservation, and bioenergy. He has published 17 papers and registered 1 patent in wooden utility poles processing. He has also supervised several graduate and undergraduate students in this area. He has worked on a number of regional and international collaborative projects. He is a member of professional bodies such as the International Association of Wood Anatomists and African Technology Policy Studies Network (ATPS) Uganda Chapter.
