

Lawrence B. Orikiriza

Senior Lecturer in the Department of Forestry, Biodiversity and Tourism. He holds BSc and MSc Forestry and PhD in Ecosystems Health Restoration and Management from Makerere University. He teaches Dryland Forest Resources Management, Forest fires, Agroforestry for community land management, and Hydrology and Water use in Agroforestry. His current research focuses on using soil amendments to enhance the productivity of degraded forest and wetland ecosystems, and agricultural farmlands. Dr Orikiriza is also a Trainer and Process Consultant for Integrated Natural Resources Management. He has over 13 years experience in conducting capacity needs assessments, socio-economic and environmental baselines, fire management, natural resource and catchment management planning and stakeholder engagement. He has authored and co-authored 9 publications and 8 technical reports, and attracted 2 research grants.
