

**Shuaib Lwasa**

He has over 15 years of experience in university teaching and research working on interdisciplinary projects. His recent work has been in the fields of climate change mitigation, adaptation of cities to climate change, urban environmental management, spatial planning, and disaster risk reduction, as well as urban sustainability with links to livelihood systems and vulnerability to climate change. He has published on cities and adaptation to climate change, health impacts of climate change, land and property rights, land use and landscape ecology, resource efficiency, and spatial planning for sustainability. Shuaib coordinates the Habitat University (UNI) climate change and disaster Hub. He also serves on the Science steering committee of Integrated Research on Disaster Risk (IRDR) and the Urbanization and Global Environmental Change (UGEC) of Future Earth
