

David Mfitumukiza

Senior Lecturer in the Department of Geography, Geo- Informatics and Climatic Sciences (GGCS). . He holds a PhD in Environment and Natural Resources and a Masters degree in Environmental Systems Analysis and Management. He has experience of over 15 years working in Environment and Natural Resources Management, including serving as a District Environment Officer. He is involved in research, education and field trials aimed at enhancing the knowledge capacity of local governments and communities to integrate environmental change and management in their planning and decision-making processes. He has wide experience in assessing vulnerabilities of ecosystems and communities to the impacts of climate change and variability and designing adaptive management responses for rangeland ecosystems and agro-pastoral systems. He has been involved in research and community outreach programs on land use and natural resources assessment, strategic planning, mapping of natural resources, and setting up information systems for monitoring, evaluation and management using remote sensing and GIS tools. He is experienced in curriculum development, course material development and administration. He teaches courses related to Biogeography, Ecosystem Science, Landscape Ecology and Management, Remote Sensing and GIS, Rural Land use Planning, Ecosystem and Community-Based Adaptation to environmental change. He has published 8 papers and won 7 grants.
