

TWO-DAY WORKSHOP: AGROECOLOGY AND FOOD SYSTEMS - THE SCHOOL OF AGRICULTURAL SCIENCES

JUSTUS-LIEBIG-

PRESENTER

Dr. STEPHANIE DOMPTAIL

Is an interdisciplinary system scientist. She studied agriculture in France and the Netherlands and earned her PhD in Bio-economic modelling of farming systems from the University of Giessen in Germany. She has extensive work experience in Southern Africa where she conducted field work. Dr. Domptail is presently interested in the management of agricultural systems as part of the (global) food system and the role the concept of agroecology can play in it.

TOPICS TO COVER

The workshop aims to enable participants to reflect on the concept of agroecology and its potential role in shaping agriculture and food systems in the Uganda context. The workshop is divided into 5 parts:

1. Introduction to the multidimensional concept of agroecology
2. Introduction to food systems
3. Group work: case study choice and problem analysis
4. Political ecology, agroecology and food systems
5. Group work: Towards redesigning food systems
